Back-to-Back & Consecutive Cruises Testing Requirements:

- For guests continuing to a consecutive sailing on the same ship:

✓ You will need to meet any travel requirements that are in place for the first cruise in your series.

- For guests who are switching ships or have a day or more in between subsequent sailings:

✓ If you are moving to a different ship for your subsequent sailing, you will need to meet the precruise testing requirements for that ship/sailing. If the time until your next sailing does not exceed a day, you may visit Guest Services onboard for complimentary testing to satisfy the requirements for your next cruise.

● To be considered back-to-back, the time between sailings must not exceed 1 day. This means your subsequent sailing must depart on the same day or the following day your preceding cruise disembarks. For example, if Sailing A disembarks on Monday, Sailing B must embark on Monday or Tuesday to be considered back-to-back. Guests whose sailings are not considered back-to-back will be responsible for procuring their own COVID-19 test at their own expense to meet the precruise testing requirements for the subsequent sailing.
